

MUD HOG®
the legend since 1976

ANY WEATHER IS **MUD HOG WEATHER**

The first and only technology of its kind, Mud Hog four-wheel drive systems are engineered to power your combine through wet, muddy conditions unlike anything else on the market today. Still, there are many additional benefits a Mud Hog can deliver in all climates – wet or dry – allowing you to:

- Harvest faster, with increased speed and traction in any weather
- Experience increased fuel efficiency
- Reduce soil compaction, helping to maximize yields
- Extend the life of your engine by allowing its hydrostatic system to run cooler
- Place less strain on your hydraulic system
- Enjoy improved handling and steering control
- Access additional torque for steep or slanted grades
- Decrease front tire wear
- Minimize field tracks and ruts
- Adjust your axle height and width
- Improve the resale value of your machine

MUD HOG – BUILT FOR THE BRANDS YOU DRIVE

With more than 100 models available, Mud Hog has a custom-engineered solution for nearly every combine brand, including Challenger, John Deere, Case, Gleaner, Massey Ferguson, New Holland, CLAAS and more.

FAST INSTALLATION. TOP-NOTCH SUPPORT.

Thousands of equipment dealers throughout North America can install your Mud Hog four-wheel drive system. What's more, every Mud Hog comes backed by a comprehensive warranty and a dedicated customer service team that's located inside our Brookston, Indiana headquarters.
